Stakeholder Advisory Board Agenda

February 1, 2021

01:30 – 01:40	Introductions
01:40 – 01:55	CenTEHR and CEC Overview
01:55 – 02:10	Stakeholder Assessment Discussions
02:10 – 02:40	Stakeholder Assessment Report-back and group discussion
02:40 – 02:30	Q&A and concluding remarks/Next Steps

Discussion Questions

- Of advisory boards you have been on, what works well?
- The CenTEHR has many capabilities and resources. Which of these resources would you want to have access too?
- What is a best practice for working with your stakeholder group?
- If you had an idea for a research project, and needed to find someone to work with, what information would you want to know about them? For example in addition to their research expertise, would you want to know about their resources and data sets?
- What are challenges you have experienced working with researchers? For example, challenges may include timing, different priorities, funding, communication, expectations, deliverables/products or data ownership.
- What are examples of successful collaborations with researchers?
